BELLS OF ABERDEENSHIRE

ATTENTION has been focused on St. Nicholas' Church, Aberdeen, by the recent letter in 'The Ringing World' from Mr. Frank T. Blagrove, calling attention to a peal of Bob Triples of 5,040 changes rung, according to 'Bell's Life of London' of December 4th, 1859, on the Wednesday previous. Until this publication, the College Youth peal rung at Old Steeple, Dundee, in 1873, was considered to be the first recorded peal in Scotland.

Mr. Ranald W. M. Clouston has now, in conjunction with the late Dr. F. C. Eeles, published Part III of the concluding part of 'The Church and other Bells of Aberdeenshire,' and this part tells of the considerable research that has taken place in regard to St. Nicholas' Church, Aberdeen—a church wonderfully rich in bell history.

As far back as 1351 there were two large bells in this church, presented by Provost William Leyth—one dedicated to St. Lawrence and the other to St. Mary. In 1634 Lawrence was recast by the well-known Dutch bellfounder Michael Burgerhuys, of Middelburg, and was known as Old Lowrie. This bell remained in use until the fire of 1874, when it was broken in pieces. The inscription on this bell, in Latin, is translated as follows:—

'To the only God be glory. Michael Burgerhuys made me in the year of our Lord 1634. Lo, I, the bell, do not proclaim the praise of that which is unholy. I glorify the Creator. I draw away the fear of thunder, I mourn in solemn tones the departed. I tell of the recurrent rites of faith, I move the heart of man that is joyful: behold me, I am Lawrence. In 1351. William Leyth, Provost of Aberdeen, presented this bell to the church of St. Nicholas of Aberdeen. Thereafter a cleft having been made in it at the expense of the community it was recast in the year 1634 while Sir Paul Menzies of Kinmundy, Knight, was Provost.'

There were then three bells. In 1794 one of the bells was sent to London to be recast by Thomas Mears I, and he was instructed to cast an additional bell. In 1803 Mears added another, making a ring of five.

A decision to provide Aberdeen with a complete ring of bells was taken in 1857, when two proposals were submitted by Messrs. John Warner and Sons, of Cripplegate, to a meeting presided over by the Provost. The scheme adopted was to add two trebles and a heavier bell to the existing five for £465. This provided a tenor in E flat slightly over 32 cwt. The treble was the gift of a Leeds banker, John Smith, and through his generosity members of St. Peter's Company of Ringers, Leeds, and others, came to Aberdeen to try out the bells. On August 30th they rang a quarter peal of Grandsire Triples, and afterwards issued a testimonial in the following terms:—

'The St. Peter's Company of change-ringers, Leeds, do hereby certify that the peal of eight bells in St. Nicholas' Church, Aberdeen, are for power and richness of tone, the finest peal of bells for their weight in the United Kingdom. They also consider them in perfect tune. Should a company of young men from 18 to 25 years of age come forward and place themselves under the tuition of Mr. Hubbard, there is no doubt of Aberdeen being put in the possession of as good a set of change-ringers as any other town in the Kingdom can boast of.—William Gawkrödger, President of the Company.'

For a time Hubbard was retained as tutor by the town council, and later a Mr. Healey, of Wakefield, became the instructor. Any prospect of Aberdeen becoming a centre for change-ringing ended with the steeple being gutted by fire in 1874. It was not until 1882 that the council decided against a ring of ten bells with a tenor of 30 cwt. for £1,325, submitted by Messrs. Warners. Acting on the advice of the Rev. H. R. Haweis, they selected a carillon of 37 bells from the Louvain foundry of van Aerschodt for £2,690. The bells, however, were stated to be of poor tone. The carillon was entirely recast by Messrs. Gillett and Johnston, Ltd., of Croydon, in 1952, and in 1954 the same firm added 11 new bells to complete four octaves. It is the heaviest carillon in Great Britain and is the property of the Corporation.

Mr. Clouston has analysed the bellfounders whose work is found in Aberdeenshire. There are only three pre-Reformation bells—a disused bell at Cruden, dated 1519, a bell at Tough, cast by William Culverden, of London, and a bell at Turriff (1556). Of the Continental bells, the largest number came from the Middelburg foundry on Walcheren Island, Holland. The Severin van Aerschodt carillon of 37 bells (largest, 54 cwt.) has, as previously stated, been recast. Naturally there is local interest in the products of the old Aberdeen Foundry, which seems to have operated since 1686, firstly through the Kilgours and afterwards John Mowat and Andrew Lawson. A number of Scottish founders of the last century and their work is also listed. The Whitechapel Foundry have had a market in the county since 1567, and the work of John Taylor and Co. is also well represented. John Warner and Sons and Gillett and Johnston have also specimens from their foundries, the latter recasting and augmenting the carillon.

The work of the authors merits the attention of all interested in bell history and, selling at 3s. post free, bearing in mind its excellent illustrations, indicates an indebtedness to some good friends. These parts have been reprinted from the proceedings of the Society of Antiquaries of Scotland, Vol. xciv. Session 1960-61.

In Memoriam - John Fitzgerald Kennedy

The assassination of the President of the United States of America on November 22nd, 1963, was followed by a manifestation of world-wide sympathy with his widow and the people of the American nation. Throughout Great Britain bells were rung half-muffled on the following Saturday and Sunday to the memory of a great statesman and a ceaseless worker for international peace. Our first instalment of half and quarter peals rung to his memory and in thanksgiving for his life is printed below:

ABERFORD, WEST YORKS.—On Nov. 23rd, 1,272 Minimus (in five methods): 1. Johnson 1, R. Aldington 2, E. King 3, M. King (cond.) 4.

LINCOLN DIOCESAN GUILD

West Lindsey Branch

The last meeting in the current year was held at Saxilby on November 16th, and was well attended in spite of the fact that there was a Central Branch meeting at nearby Scothern on the same day.

Towers represented were Haxey, Belton, Gainsborough, Lea, Upton, Willingham, Stow and Saxilby, while visitors from the Central Branch, Nottinghamshire and Yorkshire were welcomed. The two special methods, Hereward and St. Albans were frequently called for any many other Minor methods were rung, along with Bob Doubles and rounds for the less skilled.

Due to the Vicar being incapacitated the service was conducted by Mr. G. H. Bingham, a lay reader from Willingham-by-Stow, and an excellent tea provided by local ringers, wives and friends followed.

During the business meeting a reminder to peal ringers was given by the Ringing Master, who said when ropes were adjusted in towers they should be put back to their original length before leaving.

It was mentioned that as the annual meeting is to be held at Gainsborough, an eight-bell tower, and as most members are used to six bells, the special methods should not be complicated. Plain Bob Major and Cambridge Major were chosen; ringing to continue until the service at 6 p.m., which will be followed by tea, the business meeting and a social evening.

The business meeting concluded with a vote of thanks to the Vicar, to Mr. G. H. Bingham and to the ladies who provided tea. Ringing was resumed until nearly 9 o'clock.

OTHERS MIGHT FOLLOW

Grundisburgh ringers had a recent Saturday hop, visiting five or six towers, and after enjoying the bells left 5/- in each church as tangible appreciation.

In his letter of thanks one Vicar writes: 'It is very rare in my experience that anyone troubles to say thank you for such use of bells—and rarer still to cap it with a gift. Many thanks.'

DERBY DIOCESAN ASSOCIATION

Chesterfield District

In spite of the miserable weather the District's first meeting at Killamarsh on November 9th was quite successful, and most of the local company became new members! The tenor proved difficult to set, nevertheless some good ringing took place on the pleasant 11 cwt. six before tea.

At the short business meeting, which followed tea in the Rectory, Mrs. V. Stones and Messrs. A. Parr, E. Morris, J. Jennings, G. Martin, R. Green and C. Fisher (all of the local company) were elected new members.

The Rector (the Rev. G. S. Cheetham), the local company and the ladies for providing such an excellent tea were thanked.

In the evening methods rung on the half-muffled bells included Killamarsh T.B., London S. Minor, Spliced St. Clement's and Kent T.B. together with a very good course of Oxford T.B. with each change repeated.

HIGHCLERE RINGERS' SERVICE

The second annual bellringers' and choir festival of St. Michael's, Highclere, was celebrated on November 24th. Ringing started at 8 a.m. for Holy Communion and again at 10.30 a.m. for Matins. In the afternoon a peal of Bob Major was rung, in which two ringers scored their first on eight bells. At Evensong Mr. G. Dodd, the captain gave a short talk on the choice of the hymn, 'Abide with me'. There was handbell accompaniment to the singing of this hymn, and also to the hymn 'Now the day is over'; the singers being lady members of the choir. Further ringing followed, in which visitors from Tangley, Bucklebury and Thatcham joined the local band.

Adelaide Town Hall Bells Ringable Again

By RONALD K. RUSS

COLONEL WILLIAM LIGHT was one of the early explorers of South Australia, and, one day in 1836, while standing on a hill overlooking the sleepy Torrens River, he had a vision of a beautiful city. He decided this was the place to build the state capital, and named it Adelaide, for the wife of William IV. In 1840 it was incorporated as a city, the first in Australia to be so designated.

Today the city has grown into the fourth largest in Australia, with a population of some 565,000, but it continues to reap the benefits of Light's vision, and his careful planning in the form of a square, with wide, tree-lined streets. In the very centre of the city is Victoria Square, with a statue of Queen Victoria, and standing sentinel, overlooking the square, is the Albert Tower of the Town Hall, so named after the Queen's Consort.

In recent years the tower has become dwarfed by the adjacent city sky-scrapers, but regained some measure of its former glory when, on Saturday, September 21st, 1963, its eight bells rang out in full peal for the first time in 54 years. Being completed early in 1866, its style is reminiscent of many London towers of this period. First and second stages are built to form arches at street and balcony levels, the third stage forms a square ringing chamber, this being surmounted by a smaller clock chamber, also square. Stage five is octagonal, being a system of louvre-filled arches, housing the bells. This in turn is surmounted by a smaller octagon of open arches supporting a small lantern spire. The tower is 175 feet high.

John Warner was commissioned to cast a ring for the tower in 1865 as it neared completion, and the Albert bells came into being. Their story is now unfolded.

They, of course, figure among the few secular rings of the world, being one of only three town hall rings hung for change ringing. The other trio are at Ballarat, also in Australia, and Manchester. The bells were shipped on a craft called the 'Edinburgh' and arrived on May, 9th, 1866. They formed one of the first, if not the very first ring to be hung in Australia, and the newspaper reports of the time add colour to the story.

The South Australian Register for May 10th, 1866, tells us that 'as the bells are stowed in the wake of the pump well, near the main hatchway, the chief officer is of the opinion that they will be discharged at an early date.' The Daily Telegraph, the previous day, said, 'there is now a possibility of their being fixed in time to ring a peal at the opening ceremonies of the Town Hall.' (An unfortunate choice of words, since, in fact, the bells never have been pealed.)

COST £724

The Register for Friday, May 24th, 1866, gives some interesting facts and figures:

'A considerable number of spectators gathered near the Albert Tower on Wednesday to see the peal of bells recently imported per "Edinburgh" raised into the tower.

The diameters, weights and tones of the bells are as follows:

1. 29"	5-3-6	F.	5. 35"	8-2-10	B flat.
2. 29½"	5-3-7	G.	6. 37"	9-1-23	A.
3. 30½"	5-3-3	D.	7. 40"	10-3-25	G.
4. 32½"	6-2-24	C.	8. 44"	13-2-13	F.

Total weight: 3 tons 6 cwt. 2 qr. 27 lb.

Cost and Charges:

Bell Metal £7-4-8 cwt. Total £482-15-3.
Eight Elm Stocks, gunmetal bearings, etc., £66-4-0d. Framework £90. Chiming Apparatus with spring hammers, etc., £45. Shipping expenses, insurance and packing £40-4-0d. Total £724-3-3d.

'It is quite possible the bells will be ready for chiming on the anniversary of the Queen's Accession, June 20th, but we understand the architect does not think it advisable that they should be rung for some time to come.

The newspaper's weights are quite correct, and the third is in fact the lightest bell. Is this unique? The cost figures are in Australian currency, which converted at the present rate totals about £580 sterling, an amount which would not go far in such a scheme nowadays.

Chiming did take place at the opening ceremonies of the Town Hall in June, 1866, and on the following Sunday to fit church service times. In 'The Register' for August 7th, 1866, we read:

'The Lancashire bellringers visited the Town Hall on Monday morning for the purpose of practising on the Albert bells. Several chimes as well as changes were performed on six and eight bells, and the beautiful melody "Home, Sweet Home" was also played, the chiming in general being very correct and of a superior character throughout. It was performed by means of ropes, two bells being allotted to one ringer. A citizen, Mr. S. Pryor, who superintended the fitting up of the bells and who belongs to the Albert Bell Ringers' Society, assisted in two of the closing chimes with considerable skill. It may not be generally known that there are comparatively few airs, either sacred or secular, that can be performed upon eight bells. The conditions are:

1. That the time shall not extend beyond the tonic and its octave.

2. That there shall be no "accidentals" introduced.

'Among the sacred airs which comply with these conditions are Rousseau's Dream, Mariners, Jerusalem, Arabia and Suffolk, and of secular airs, The Last Rose of Summer, Home Sweet Home, Vilikens and his Dinah. Even such simple airs as Sarah, Old Hundred and National Anthem cannot be played upon eight bells.'

LANCASHIRE BELLINGERS

I wonder who the Lancashire bellringers were, and why they should choose a Monday morning to practise? From the description one could assume there were only three or four of them. Maybe they were immigrants who played a large part in ordering the bells. The Albert Society was in being at this time and its members seem to have gone gay with their chiming in the first few months after installation. Ringing has always had its antagonists, and here was no exception, for within months of installation we have the first nuisance reports, from which one can deduce that the chiming was frequently of a poor standard!

'The Register' of October 1st, 1866, tells us that, 'The talk is that the Albert Bells are becoming a real nuisance. That they break out with a horrible clangour at all hours of the day without any apparent reason; that sometimes they sound as if they were afflicted with St. Vitus' Dance or had taken a drop too much; that this should be reformed, that the bells ought to be rung on only very special occasions and if they are rung for bazaars and such like, familiarity will breed contempt, and we may expect them to break forth into frantic ecstasies because Jones' cow has calved, or Smith's son has recovered from the measles; that the Mayor should direct a "rigorous eye" to this matter.'

A happy medium must have been found for no further reports appeared. For at least

a year after hanging the bells were only chimed. This fact is evidence from the only other news item I have been able to trace, which appeared in 'The Register' for July 6th, 1867. From this it appears that despite Mr. Pryor's superintendence at the installation, full circle ringing was impossible!

MR. COLLINGS' ADVICE

The article reads:

'Not long after the Albert Bells had been hung, and the chiming apparatus adjusted, some manifest defects were discovered. But imperfections are more easily detected than remedied. Mr. T. G. Collings, of Franklin St., has, however, effected both of these objects. He was one of the first to point out in what respects the chiming apparatus had been imperfectly adjusted, and the Corporation having confided to his charge the superintendence of the necessary alterations, they have been made to the satisfaction of the city council. He has also effected some important improvements in the hanging of the bells, so as to allow them free scope for swinging whilst they are being rung, by shortening the space between the head of the bells and the axis on which they turn. With respect to the chiming apparatus the principal improvements consist of a careful readjustment of the nuts upon the cylinder so as to secure their regular action upon the steps or levers which communicate motion to the hammers in the belfry.

'Mr. Collings states that his experience has convinced him that the Albert Bells are very superior in tone as compared to their size, and that the effect upon the ear would be very considerably improved by converting the belfry into a sound chamber by closing up the sides with wood and allowing the sound to pass upwards into the higher lantern, and thence to escape into the open air. He says that this alteration would effectually get rid of the humming noise so much complained of, and that the tones of the bells would very much commingle and roll over the city in a rich, delightful swell of harmony.'

It could be that the louveres were put in on Mr. Collings' advice, but if they were in existence at the time of this article, then the council did not take his advice, because the louveres are not boarded up at all.

LAST RUNG IN 1909

The fortunes of the Albert Society are not known, but it was in existence until 1909. Members of the Society opened the ring of six in the Adelaide suburb of Walkerville in 1887, but the general concept of opinion is that they never aspired to anything beyond call changes, and spent much of their time chiming the bells. The bells were last rung in 1909, when the 'Waratah' disappeared off the South African coast with a number of South Australians on board. I would like to think that ringing for such an occasion was muffled, but we found no trace of muffles in the tower. It appears that the ringers were paid for their services and chose this occasion to ask for more money. Instead they got the sack and the bells fell into disuse.

To what extent the chiming apparatus was used during the 54 years of ringing silence is not clear, though in comparatively recent times it was restored, and the original drum made to revolve by electric motor. The bells are currently sounded by this means on Sunday evenings, rounds and queens figuring in the chimes.

To be continued.

COWLEY, OXFORD.—On Oct. 21st, 1,260 Plain Bob Minor: Mrs. V. Holloway 1. Miss B. Martin (first of Minor) 2. W. Fern 3. J. Sutton 4. I. H. Gardiner 5. W. Holloway (cond.) 6. Letters to the Editor

Mr. Woolley Explains

Dear Sir.—In reply to Mr. Chant and Mr. Moxon ('R.W.', November 22nd), I fear my first letter may not have been expressed in clear or full enough terms; but it would be strange indeed if the various elementary points on which they claim to 'correct' me should have escaped my notice. I learned change-ringing on hand-bells, ringing Minor, and was ringing a pair to a number of methods up to Surprise Minor over 40 years ago.

Mr. Moxon is strictly correct in what he says about bobs at H. For sixth's place methods the tenor must be called Out three times, and this produces a 3-course touch; actually the same touch, only started at a different lead. But these calling places correspond for the two types of method, a fact that I considered too well-known to need elaborating.

I am aware that the tenors become parted within the lead during some part of the plain course. This happens in all methods, sometimes very much so. But 'parting the tenors' also means calling them into positions occupied by 3-4 in the course. It was in this sense that I used the term, and I think it was clear from the context.

Were there no other 720's than the well-known 3-part, and its variations, I could understand that talk of 'learning' a 720 might cause amusement. But there are many other 720's, a fact which should be known to a conductor in an essentially 6-bell district. Without wishing to belittle the performance at Cawthorne, in 1883, and similar ones elsewhere, I maintain that it would have been even better had they rung the 14 methods in two separate peals (or one 10.080) in full 720's. And for the conductor a better performance to have called seven distinct 720's, even in one method.

I must say that I deplore the attitude of mind expressed in both letters, which suggests that ringing is divided into two hostile camps—6-bell ringers versus the rest. Mr. Moxon might remember that Minor is rung in many places outside the Barnsley district, and Mr. Chant that if one goes round looking for slights and insults one may often see them where none are intended. Of course, if one throws bricks they may be thrown back. To stress the difficulties in ringing on the various numbers, one against the other, is both unrewarding and futile. I think the most difficult thing the average ringer ever does is to learn to ring in the first place. It certainly was for me.

In conclusion, I would like to send my best wishes to the Barnsley and District Society. I have very happy memories of ringing in Yorkshire during the last war, and much of this was done in that area, where I remember 6-bell ringing of a very high standard. And I must mention my old friend, the late Daniel Smith, a fine ringer and a man I am glad to have known. I do not intend to write again, but should be very glad to hear privately from anyone I met at that time, including, of course, your two correspondents.—Yours faithfully,

C. W. WOOLLEY.

39, Titian Avenue, Bushey Heath, Herts.
P.S.—Having read my friend Mr. Barton's letter, I must say I never intended for one moment to hint that the Yorkshire ringers rang their methods in 360's because they were incapable of ringing or calling full 720's. What an idea! Nor yet because they wanted to make it easier for themselves; though, in fact, I think it does. Further, it was E.C.S., not I, who described Dr. Carpenter's suggestion as 'naïve' my first letter was written to suggest that it might have been intended seriously. In view of your heading I must add that I would never dream of attacking Yorkshire ringing. I would

not want to, and I would not dare! I might twist the lion's tail, but I would not put my head in its mouth.—C. W. W.

The Bells of Finedon, Northants

Dear Sir.—The bells of Finedon have for long been a ring cherished by ringers over a wide area. The eight, with its 21 cwt. tenor, is notable for its fine tone, and for being one of the few comparatively light octaves in the key of D.

The original tenor is said to date back to 1613. The bells were recast in 1825 by W. and J. Taylor, of Oxford, when there were six. They were augmented to eight by Taylors of Loughborough, in 1897. A mishap to the seventh caused this bell to be recast in 1913 by Gillett and Johnston, along with the third, fourth, fifth and sixth. The ample weights of the sixth and seventh provide a good match for the tenor and go to make up a well-balanced ring.

The bells have been causing considerable concern recently, having had no attention since 1913, and are now in urgent need of re-hanging. A quotation has been made of approximately £480, and the task of raising this sum has been laid on the local ringers, in a parish where £15,000 is already needed for the restoration of the roof of the fine Decorated church.

The band has recently been strengthened by the recruitment of four promising learners, two of whom have just scored their first quarter.

The band has not stood still and £80 has already been raised in a few months. But even so the task is still formidable, and we feel we must appeal to any ringers who have been impressed by this ring in the past to help preserve it in a ringable state. Contributions should be sent to the undersigned and made payable to the Finedon Church Ringers' Maintenance Fund. All contributions, however small, will be gratefully acknowledged.

We hope it will not be too long before these fine bells are restored, and their go matched with their excellent tone.—Yours faithfully,

NOEL F. PEARSON.

23, Mulso Road, Finedon, Northants.

Thank You, Australia

Dear Sir.—I should like to make known, in the pages of 'The Ringing World,' my warm appreciation of the kindly welcome and generous hospitality shown to me by ringers in Australia during my recent four months' stay there. I shall long remember arriving at Fremantle, when, within minutes of the ship's coming alongside the terminal, the Perth ringers came on board to take me off for a wonderful day's ringing and sightseeing; but this was a foretaste at what was to happen at every other city I visited. Whether at Adelaide, Melbourne or Sydney, where I stayed only a few days in each case, or at Hobart, where I lived for three months, I received a warm and hearty welcome not only in the towers I visited but also in the homes of ringers; moreover, several people gave up a good deal of time to showing me the sights of their city or district. I can assure any ringers thinking of emigrating to Australia that they will meet a friendliness and enthusiasm for ringing unequalled anywhere that I know of. I certainly appreciated it more than I can say.

Thank you, Australia.—Yours sincerely,
SHIRLEY RYMER.

Sandown, Isle of Wight.

A Correction

Dear Sir.—With regard to the peal on page 803 of 5,040 Minor rung at St. Stephen's, St. Albans. I would like to point out that the person ringing the fourth was Christine M. Rimmer and not as printed. I would have thought that the national Press had already dealt more than fully with this matter without the pages of 'The Ringing World' having to be sullied as well. I hope this mistake was caused by a slip of the pen at some stage between sending this peal up and printing, combined with inadequate checking at the final stage of printing.

Whoever is responsible for this must surely realise that nothing less than an apology to the five other ringers taking part, the Church, the Hertford County Association of Change Ringers, the Exercise as a whole and, last but not least, myself, can rectify this matter.—Yours sincerely,

CHRISTINE M. RIMMER.

Park Street,
St. Albans, Herts.

NOTE.—The Editor expresses his sincere apologies to Miss Rimmer at the inadvertent publication of a substituted name in the peal in question.—T. W. W.

Nomenclature

Dear Sir.—Now that the controversy has died down and having no particular axe to grind, I would like to make one or two observations relative to methods.

1. To my mind a method varying only by a few changes from a parent method (e.g., double Kent places instead of a triple dodge) should be called a variation of that parent (Yorkshire, Braunstone variation). From this I would exclude the lead and half-lead variations for they do produce a vastly different 'blue line.' How many people could ring Belgrave Maximus by just knowing that the lead-end was 12ths instead of 2nds?

2. If a method, or variation, is rung for the first time in a peal of spliced then that name should stand. I think that it is about time the Central Council made a ruling on this matter. With all the untapped wealth of methods yet to be rung this 'stealing' is quite unnecessary.

3. When naming a method the conductor should look closely at the Minor methods, and make sure that the name he is giving it is not duplicated in the Minor. For instance, there are Norfolk Minor and Norfolk Major, Ipswich Minor and Major and these do not bear any relationship to each other at all!

4. I should like to see published in place notation some of the better Delight Major methods, and I am sure that this would stimulate interest in this rather sadly neglected field. I myself would like to ring peals of Delight Spliced, but as yet I have seen no compositions.

The title Surprise seems to set a method on a class of its own, anything else makes people think, 'Oh—a Kent type of method.'

May I conclude by saying that these are only observations of mine, and I am not having 'a go' at any person or groups of people.—Yours sincerely,

Leicester. JOHN E. COOK

SUNDAY MORNING BELLS ON LIGHT PROGRAMME

We have received a number of queries from listeners regarding the seeming omission of the bells on Sunday mornings, and would point out that they have never been off. What has happened is that the programme now starts earlier and the bells can be heard at 8.25 a.m., approx.

THE SOCIETY OF WESSEX SCHOLARS

Another Society has come into being, largely through the initiative of Mr. Frank C. W. Knight, known as the Society of Wessex Scholars. The creation of the Society was prompted by the large number of towers throughout the country in which the bells were never rung because of the absence of ringers.

The main function of the Wessex Scholars is to teach young ringers in their own towers and to take bands of ringers each Sunday to the towers where the bells are never or rarely rung. As it is a teaching Society, qualifications for membership are stiff. It is restricted to males who are 14 years of age and have rung any bell other than a cover bell through a peal of 5,000 or more changes in a standard method, or six or more bells. This condition does not include Doubles. Membership of the board of officers, consisting of a Master, secretary, minutes secretary, treasurer, steward and under steward, is limited to those who have conducted a peal of not less than 5,000 changes in any standard method on not less than eight bells, this condition to include Triples.

The headquarters tower of the Society will be in or near Winchester. District Branches can be formed as the board of officers think necessary. These will be governed by a District Master, District secretary, District treasurer and other officers as may be regarded as necessary.

Life membership fee has been fixed at 10s., and a charge of 3d. per head will be collected from all members and friends attending a general meeting or ringing meeting of the Society.

Mr. F. C. W. Knight has been elected Master of the Society and Mr. A. R. Carter, of 37, Wharf Hill, Winchester, secretary. Applications for membership, stating qualifications and enclosing the 10s. life membership fee (which is returned if not elected), should be sent to Mr. Carter. We are informed that membership of the Wessex Society is growing fast.

LITTLE ASTON MAKES HISTORY FOR SOCIETY

The resident Sunday service band of Little Aston, Staffs., have provided a landmark for the Society for the Archdeaconry of Stafford by a peal of seven Surprise Minor methods on November 16th. This has taken the Society 80 years to achieve!

The Little Aston ringers were responsible for the first peal of Beverley Surprise Minor for the Society some two years ago, and since then their repertoire has grown considerably. The quarter peal columns of 'The Ringing World' tell of the many new methods they have rung, and the writer can confirm that the standard of ringing has been very high.

The peal is the outcome of many years of training of recruits by the conductor and deputy tower captain, Michael W. Fairey. The girls who rang the treble, second and third are his pupils and are still in their teens. The co-operation and interest of the Vicar, the Rev. H. H. Follis, has spurred on the band, and the success of the peal must be to him doubly pleasing as his daughter rang the treble to her first peal.

THE DEVON ASSOCIATION

THE annual meeting was held at Diocesan House, Exeter, on Nov. 16th, under the chairmanship of its president, Mr. T. Oatway, when about 40 towers were represented. The meeting was very glad to welcome Mr. Norman Mallett as representative of the Devon Guild of Ringers.

After the usual formalities had been completed, discussion was centred upon arrangements for the 1964 festivals, which were decided as follows: Eight-bell, Chagford, April 18th; six-bell (south), Ermington, May 9th (bells recently rehung); six-bell (north), Monk-leigh, May 23rd (about five miles from Bideford on the Holsworthy road); six-bell (final), Christow, June 13th (in the Teign Valley). Judges for these events were also nominated.

Representation on the Central Council was discussed and Mr. Bartlett stated that, to his regret, he thought that he would again find it impossible for himself to attend the meeting at Truro at Whitsun, but Mr. H. Pidler and Mr. T. G. Darch stated that they looked forward to going.

Mr. Bartlett announced that he hoped to once again arrange an invitation six-bell competition on June 27th and as Broad Hempston had offered their tower the festival would be held there—in aid of the Historic Churches Preservation Trust. The hope was expressed that the usual support would be forthcoming.

The meeting closed shortly before 5 o'clock after a notice of motion had been given that the competition eight-bell peal should in future be 'Westminster' as a change from 'Queens' as hitherto.

50 YEARS AGO

'R.W.' December 5th, 1913.—

This issue of 'The Ringing World' is a veritable 'peal number,' for seven-and-a-half of our pages are occupied with the reports of performances of over 5,000 changes. It is a remarkable record for one week, and only once, we believe, have we exceeded this number in a single issue. There seems to be, just at present, quite a boom in peals, and while we doubt if this year's performances in this direction will equal in number the extraordinary figures of 1912, the closing months are, at any rate, producing results which will make up some of the leeway lost in the earlier part of the year...

OBITUARY

MR. T. H. TAFFENDER

A TRIBUTE FROM YORKSHIRE

The death of Mr. T. H. Taffender cannot be allowed to pass without comment upon his connection with Yorkshire over a great number of years, a connection occasioned mainly by holidays spent at Scarborough, which echo and re-echo with Mr. Grainger's words of him that 'he gave fully of that encouragement so necessary to the young ringer and conductor.' He did indeed! I recall one August Sunday afternoon when he taught me to ring Stedman, and for that and later encouragement I remember him with gratitude. On the occasion of this visit we met eight at St. Mary's in the morning, but withal one short for Stedman. Accordingly he called me to spend the afternoon with him—during which he explained Stedman so thoroughly that for Evensong, with him on No. 2 and me on the treble, I rang my first courses of Stedman Triples.

At this time he had already been coming to Scarborough, intermittently, for 30 years or more. His visits usually meant two or three peal attempts, and the Y.A.C.R. record his first peal for the Association at St. Marie's, Sheffield, in 1903, Stedman Triples, which he conducted, and his first at Scarborough in 1910, again S.T., conducted by him. There must be many ringers with peals recorded due to T.H.T.'s visits to Yorkshire and I myself recall particularly Caters at Holy Trinity, Hull, and Beverley Minster. His total for the Yorkshire Association was 29, in 15 towers (over a span of 53 years), and at least one more, at Scarborough in 1936, rung for the London County Association. Of the 29 five were rung at St. Stephen's, Fylingdales, one of his favourite Yorkshire towers.

One recalls the friendly discussions he had with other regular visitors, Yorkshire stalwarts J. H. Brothwell, P. J. Johnson and H. Loft-house for a few; also how he was always ready to welcome provincial ringers to London with visits to some of his towers. This I experienced on several occasions.

With his passing another character has gone, one who will surely be missed from the Yorkshire Coast scene at Bridlington, Scarborough and Whitby, a familiar figure at their practices and at the August meetings of the Beverley and District Society at Bridlington. In Scarborough he held a place of his own; now 'Soon be time for Taff to come' will not, alas, be said again, and his cry 'Up, up, up' no longer heard.

May he and Mrs. Taffender, who was always with him, rest in peace.

B. SUTTON.

MR. FREDERICK CHAMBERLAIN

Tirley, Gloucestershire, has lost a faithful servant of the church by the sudden death on November 19th of Mr. Frederick Chamberlain, aged 76.

A member of the Tirley band for over 40 years, and also of the Gloucester and Bristol Diocesan Association, he rang regularly for services. For some years he was clerk of the church and for the last few years had been churchwarden.

Four Tirley ringers acted as bearers at the funeral service on November 23rd, which was conducted by the Vicar (the Rev. L. J. Stanford). Immediately afterwards the bells were rung muffled.

THE TENOR'S SECRET

By T. A. BEVIS

St. Mary's Church, Dennington, Suffolk

DENNINGTON, an attractive Suffolk village, contains in its few square yards a goodly vision of history and beauty which combine to stimulate the imagination of any who step from the outside world into a peace afforded by ancient, time-honoured acres, wherein sleeps in God's particular space a hero of Agincourt, Sir William Phelip, later Lord Bardolph, who was borne from his manor home to the church in 1441.

St. Mary's Church, at first glance, does not impress the visitor as being a place of exceptional merit. Nevertheless it is a deceptive and commodious fane, well-proportioned, 50 yards long, and it has need of length and breadth for it is full of treasures and curiosities of the past.

Here in retirement is a clock pendulum which regulated the time for 700 years; the skeletal-like timepiece can also be observed at the side of its inseparable companion. An unusual item is a sand-table upon which the illiterate learned to write. It was last used by an elderly resident in 1895.

The church has a legacy or rich wood-carving as well as possessing interesting features carved in stone. The 14th century nave is filled with 15th century benches complete with poppyheads and tracery; on these we see animals and birds, mermaids, angels and a quaint figure known as a Sciapus, a strange race created by medieval imagination and superstition, having tremendous feet which they held over themselves as parasols.

Overlooking this wonderful assortment, admirably illustrative of those weird fantasies conjured from men's minds all those years ago, is a striking three-decker pulpit from which the parson would be able to see any who were 'imprisoned' in those monstrosities called box-pews, one of which has a row of pegs on which the lord of the manor and his sons hung their wigs.

Delicate wooden screens for which Suffolk is famed, and the colour of receded years, the cool vastness of this country church, a tenor bell with a puzzling secret, and the dignified presence of the man who saw Sir Thomas Erpingham throw his truncheon in the air before dashing into battle with Henry V, magnetises those fortunate people known as 'church-grabbers.'

An effigy of Sir William Phelip lies on the right of that of his wife, this reversed arrangement indicating that Sir William inherited his title from the lady.

Mr. (Jack) Daines is leader of the ringers and he and eight other men ensure that the bells are rung each Sunday, with the exception of the period between haysel and harvest, according to custom hereabouts.

The first peal in the tower, conducted by George E. Symonds, was rung for the Norwich Diocesan Association. In 1915 the five original bells were rehung from a steel frame, and at the same time a new treble was added, with this inscription: **ALFRED BOWELL MADE ME 1915, CAST DURING THE GREAT EUROPEAN WAR**, this reference placing the bell in an historical setting for future generations.

The second and third are pre-Reformation bells and are dedicated to St. Mary and St. Margaret respectively; the fourth, dedicated to St. Thomas, was recast by Bowell at the time of augmentation. Brands of Norwich cast the fifth bell in 1628, but it is the tenor, one of Bowell's heaviest—if not his heaviest (19 cwt., E flat)—which inspires a profound interest, for a heavy air of mystery surrounds its ample bulk.

Although recast by Alfred Bowell in the dark years of the war the bell, happily, retains its original inscription, devised at a time when the talk of the land was centred on a certain dreadful fire.

**1666 ANNO ORBIS INCENDIO REDEMPTI
URBIS PEREMPTAE:
GUIL:BELL : T.P. : VICARIUS
JOHN DARBY MADE ME**

It is apparent that Darbie (or Darby) a roving founder of Suffolk origin, made the bell for a parish the Vicar of which was called William Bell. That incumbent certainly did not serve the parish of Dennington, which has always had Rectors.

For which church and parish was the tenor made and under what circumstances did it find its home at Dennington? Perhaps one day the mystery will be solved . . .

EXHALL-BY-COVENTRY.—On Nov. 11th, 1440 Exhall Delight Minor: D. S. L. Lloyd 1, I. P. Unsworth 2, G. P. Hammond 3, K. F. Gardner 4, D. J. Allen 5, W. A. Stote (cond.) 6. Believed to be the first extents ever rung in this method.

FARNBOROUGH, SOMERSET.—On Nov. 3rd, 1260 Doubles in 11 methods: K. Baker 1, A. Perry 2, M. Horseman (cond.) 3, M. Heymann 4, R. Smith 5, J. Coombes 6. First in eleven methods by all except the conductor.

HURSTBOURNE PRIORS, HANTS

The bells at Hurstbourne Priors had their first recorded quarter peal rung on them on October 30th. These bells were considered unringable for about 50 years till 1958, when a peal of Plain Bob Minor was rung on them after restoration work had been carried out by Geoff Dodd. A quarter peal of Cambridge Surprise was planned for this occasion, being rung at the first attempt.

The front five bells were cast by Henry and Ellis Knight at Reading in 1667. The inscriptions on these follow their well-known pattern:—

I as treble begin.
I as second sing.
I as third ring.
I as fourth sound.
I as tenor hum all round.

A tenor was cast by Henry Bagley, of Witney, in 1745. The frame is massive, the third swinging in a separate frame above the other bells. The wheels on the back bells are about seven feet in diameter, part of the sole of the fifth being completely rotted away due to a leak in the roof, which has now been repaired.

Three of the ropes hang along the north wall and the other three along the south wall. The tenor rope falls in one corner about eight inches from either wall, and is best rung by facing the corner and skinning your knuckles.

The fifth has the garter hole in the wrong place, very little pull at handstroke being possible. The third has a plate on the stay which inadequately holds it together. The others have no peculiarities, apart from being false struck and dropping during ringing!

The band who rang in the 1,296 Cambridge Surprise Minor were: Arthur Sayers 1, Ronald Christopher 2, Geoffrey Dodd 3, Walter Hunt 4, David Papworth 5, William Butler (conductor) 6.

The thanks of the band are due to the Vicar of Longparish for permission to ring, and to Ron Christopher, who spent most of the previous Saturday greasing, tightening and splicing up the ropes. **W. B.**

THE LADIES' GUILD

South Wales District

The South Wales District held a very enjoyable and well attended meeting at St. Woolos' Cathedral, Newport, on November 2nd, when the twelve bells were well used during the afternoon under the able direction of Mrs. Barbara Wylde.

The Rev. Peter Clemett, Cathedral chaplain, took the service, and the organist was Mr. Spooner from Machen. The Cathedral ringers afterwards served tea in St. Woolos' Hall. A collection was taken towards this and the sum of £2 10s. was given to the Cathedral Extension Fund. Mr. Jack Alsop thanked Miss Trowbridge and her helpers; Mrs. B. Wylde thanked Mr. Spooner; and Miss Kathleen Watkins, vice-president, thanked the Rev. Peter Clemett, for his warm welcome.

A special welcome was extended to visitors from Abbot's Leigh, Somerset, Mr. and Mrs. N. Coombs and their son, Mr. C. Coombs. At the business meeting the Misses Gwen Bidgood (Whitchurch), Anne Davies and Anne Humphris (Bedwellty) and Jeanette Paddon (Marshfield) were elected members.

Next meeting: District annual, Swansea, January 25th. **J. S. K.**

St. Peter's, Tiverton, Change
Ringing Society when they
visited Milverton on Novem-
ber 23rd were met by that grand old stalwart,
Claude Tarr. He was persuaded to take part
in 180 of Grandsire, his first half-pull changes
since his serious illness. The bells were rung
half-muffled as a mark of respect to President
Kennedy, and also to a former Rector, who
had died that week. Ringing also took place
at Wiveliscombe.

Mr. Noel F. Moxon, of Green Gables, Caw-
thorne, Barnsley, will be pleased to send
notations of any of the 41 methods rung in
the peal at Cawthorne on November 23rd.

Will Mr. A. N. Stubbs, formerly of 29,
Sutherland Place, London, W.2, inform the
Editor of his new address for his 'Ringing
Worlds.'

When the organiser of the recent Bolsover
outing, Alan Keller, presented his itinerary to
the coach driver, the latter asked him if he
had booked a helicopter!—'Belfry News.'

Miss Carole Sone was congratulated by her
grandfather, and the rest of the band, after
ringing her first quarter at Brenchley on
November 24th. She started ringing last
Christmas, and, although only 12, has made
many ringing friends, especially in Kent.

There is friendly rivalry amongst the lady
ringers at St. John's, Cardiff, over ringing the
tenor. The first lady ringer ever to ring this
bell to a quarter peal is Miss Glenys Evans.
We think her triumph will be very short lived
as several other lady members are in strict
training for the same honour!

After a lapse of a number of years, Mr.
Reginald Beale, of Taunton, is back again
conducting with a fast but good peal of Plain
Bob Minor at Curry Mallett. He expresses his
thanks to all the band, especially to 'Turner
Tenor.'

The quarter peal rung at Warnford, Hants,
as a mark of respect to President Kennedy, on
the evening of his death, was rung immediately
after the normal weekly practice and came
round at 9.45 p.m. Was this the first touch
to be rung for the occasion by the Exercise?

BELFRY GOSSIP

With the peal of Grandsire
Triples (Holt's Original) rung
at Lenham, Kent, on Novem-
ber 17th. Mr. T. E. Sone informs us that the
Original has now been rung 375 times for the
Kent County Association since its formation in
1880. There have been 58 conductors, of whom
at least 47 have passed on. The peal has twice
been rung for the K.C.A. non-conducted—at
Aylesford on April 30th, 1892. and Tonbridge,
July 16th, 1930.

A promising pupil is Miss Margaret Twigg,
of Enfield, who, in her first quarter peal at
Enfield, rung after President Kennedy's
funeral, rang her first touch of Grandsire from
the fourth.

Mr. Tom Myers, who is still in hospital at
Plymouth, is making progress. He is very
touched by the many letters and good wishes
he has had from friends in the Exercise, but
is, as yet, unable to get down to answering
them as he tires very easily.

The St. Andrews University Guild, formed
recently, held its last meeting of the term on
November 26th. Rapid progress has been main-
tained during the first eight weeks of the Guild's
existence, and it is now hoped that a start on
change-ringing will be made after Christmas.

The conductor of the local band peal of
seven Surprise Minor at Little Aston con-
gratulates the three young ladies who took
part on their performances. The band would
like the name of Andrew J. Strathdee to be
associated with this peal as he was a mem-
ber of the band which first attempted it earlier,
this year, before he left the district to start
work at Welwyn, Herts.

The peal of Grandsire Triples at Edenbridge
to mark the retirement of the Rev. E. A.
Graham, after 25 years as Vicar, was originally
attempted on November 2nd, when he was
still living in the parish, but unfortunately this
came to grief after about 1½ hours' good
ringing due to a miscall. However, this made
the band the more determined to achieve
success, and their efforts were well rewarded
by the final result on November 16th.

MIDDLESEX AND ESSEX JOINT MEETING

Although the weather was in one of its best moods for the time of the year the attendance did not come up to expectations at the joint meeting of the Middlesex Association (N. and E. District) and Essex Association (S.W. District) on November 16th, when ringing in a variety of methods was enjoyed at St. Matthew's, Upper Clapton, and St. John at Hackney.

The service was held at the Parish Church of St. John and was conducted by the Rector, the Rev. H. A. S. Pink. Following severe damage by fire in 1955 the interior of this 18th century church was redesigned, a prominent feature being the presence of the high altar in the centre of a circular sanctuary. The delicate colouring chosen for the redecoration gives this beautiful church a feeling of light and spaciousness.

The Rector joined the company at tea, so ably provided by the local ringers and church workers, following which the District secretary extended a welcome to the members of the Essex Association, expressing the opinion that joint meetings were of great benefit to the Exercise, giving great opportunities for new friendships in the belfry to be made. Mr. C. Willmington replied on behalf of the Essex Association and endorsed the view that joint meetings were most helpful and enjoyable.

Mr. H. G. Hart proposed a vote of thanks to the Rev. H. A. S. Pink for conducting the service and for the use of the bells, to the Rev. A. Lesson for accompanying at the organ and to Messrs. Hinkley and Errington, of the local band, for having everything in readiness. Thanks were also accorded to the Rev. Trevor Southgate, of St. Matthew's, Upper Clapton. E. H. K.
